

About Summer Internships

East Side Union High School District and the Santa Clara/San Benito County Building Trades Council is pleased to announce its Summer Internships for 2012. Internships are specifically created study-based and work-based learning activities designed to provide career preparatory studies and experiences that are connected to the workplace. The construction summer internship program includes an orientation to the building trades industry and an orientation of apprenticeships.

In addition to academic studies, internships offer an exciting opportunity to receive a realistic look at a career from the viewpoint of an employee. You will become familiar with the industry, work activities and policies, and education requirements.

These study-based/work-based activities will enable you to make more informed career decisions. Because of your interaction with professionals in the work world, you will have a better idea of the academic requirements and personal characteristics needed to be successful in a construction career.
